PANCHAYAT BLOCKS AND VILLAGE DIRECTORY

VILLAGE DIRECTORY

INTRODUCTION

This is an abstract giving a complete list of all villages and towns in each taluk in the district along with the distribution of population by sex and various categories of workers. Villagewise statistics embodying the results of Census were first compiled and published in 1872 and this has been the regular feature of every census except in 1941 when, owing to war conditions, no villagewise data was tabulated. The particulars, however, were restricted to total population by sex and religion. A radical change was introduced in 1951 when population was classified into various livelihood classes in each village. In the case of Urban areas, data was presented in respect of each ward, locality, or division. (But in 1961 census, information has been compiled for each enumerator's block in the case of Urban areas). Consequent on the shift in emphasis from income or economic independence, in earlier censuses especially in 1951, to actual work irrespective of remuneration, the livelihood classes shown in the rural statistics of 1951 have undergone a complete change, giving place to ten important categories as indicated below :—

I. Working as Cultivator.

II. Working as Agricultural Labourer.

III. Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV. Working at Household Industry.

V. Working in Manufacturing other than Household Industry.

VI. Working in Construction.

VII. Working in Trade and Commerce.

VIII. Working in Transport, Storage and Communications.

IX. Working in Other Services.

X. Non-workers.

Apart from the above major difference between the 1951 villagewise particulars and the present scheme, the other minor deviation is the omission of particulars "Institutional and Houseless Population" from the list though talukwise information has been tabulated and shown elsewhere. The proportion of such houseless and institutional population to total population is so infinitesimal in the case of our villages and very negligible in the case of all towns having a population of less than 2 to 3 lakhs, that omission of this data does not in any way minimise the value of this publication.

Apart from these particulars, certain additional and special particulars have been incorporated. In order to assess the extent to which the basic amenities are available in every village which go to make it self-contained and self-sufficient villagewise particulars regarding the availability of educational, medical, irrigational and other facilities were called for from the Tahsildars and Block Development Officers and incorporated in the table. The development activities in rural areas are reflected in the existence of primary schools, middle schools, high schools, higher institutions including colleges, dispensaries, rural health centres and hospitals, maternity and child welfare centres, post offices, etc. These data have been shown inmmediately next to the names of villages in suitable notations, the explanations for which are given at the end.

Apart from this information, a few statements have been prepared based on authentic sources as indicated below :—

STATEMENT I

Prior to enumeration in March, 1961, a detailed listing of all houses was conducted in October, 1960 when essential data relating to industrial establishments were collected, the complete details of which have been presented in a separate volume entitled "Housing report and tables." But the volume is restricted to districtwise particulars relating to industries classified by number of persons working, kind of fuel used, etc. But it was felt that the types of industries existing in each village would provide valuable information and, therefore, villagewise lists of industries classified according to Indian Standard Industrial Classification is presented in this statement. Only the total number of units in each of the different types of industry is furnished for each village. But in the case of urban areas, similar information has been furnished only in respect of towns with a population of over 50,000 and for Urban sectors of the taluks as a whole.

STATEMENT II

This refers to the type of soil and type of terrain, whether hilly, river basin, high or low, sources of irrigation, important wet and dry crops and the value of such lands. Since it is too cumbersome to present the data for each village, figures have been presented for convenient groups of villages selected for geographical and geological contiguity.

An alphabetical list of villages, and another list of Panchayat Union Blocks with their population are also presented separately for each taluk.

STATEMENT I

Industrial Establishments

For the convenience of the reader this statement is presented in the following manner. Initially the total number of establishments in the district, both rural and urban, is furnished. Then figures are separately indicated for urban areas of each taluk. Next we have presented the figures for the urban areas, having population of more than 50,000 in each taluk of the district. Lastly we have given the total figures for industrial establishments for rural areas in each taluk followed by the figures for every village in the taluk.

Figures in brackets indicate the total number of establishments pertaining to the type for which the industrial code number is given. Readers are invited to refer to the industrial classification given at the end of this statement which furnishes the key to this code.

OFFICIAL STATISTICS

ADMINISTRATIVE AND OFFICIAL STATISTICS

The pages that follow present authentic official statistics on various items furnished by Government departments and other administrative bodies. In order to make a comparative study of the position that prevailed in 1951 with that on the eve of the recent census an attempt was made to present data for the decade 1951-61. This has been done wherever possible.

The official statistics available has been compiled under seven district heads, viz.,

I. Agriculture, Irrigation and Power..	(19)
II. Industry and Labour	(4)
III. Education	(5)
IV. Public Health and Medical	(5)
V. Law and Order	(7)
VI. Communication	(10)
VII. Miscellaneous	(17)

The figures in brackets represent the number of statements presented under each of these heads. Wherever necessary a small note on these tables has been given and other tables are self explanatory.

I. Agriculture, Irrigation and Power—Information on various factors influencing agriculture has been presented under this head. Statistics on Temperature, Rainfall, Land utilisation, irrigated area, irrigation scheme, etc., appear under this item. Data on irrigation schemes have been furnished separately for each Plan period. As information on power generation and consumption is not available by revenue districts, an attempt has been made to give data for the systems which serve the district areas.

II. Industries and Labour—Statistical data on industrial growth i.e., increase in the number of establishments and rise in labour force have been presented in the form of three statements. Information on services rendered by the Employment Exchange Office in the district has also been incorporated.

III. Education—The tables presented under this head will trace the development of education in the district. Information on Schools, Colleges and Technical Institutions are furnished separately.

IV. Public Health and Medical—Detailed statistics on registered births and deaths and anti-adulteration activities has been incorporated as furnished by the Director of Public Health. Under Medical, the medical facilities available in the district have been furnished.

V. Law and Order—Information on the strength of Police force, crimes detected, cases prosecuted, etc., and other related information is presented under this head. Information on jails in the district also will be found under this head.

VI. Communication—A total of ten statements are presented under this head relating to communication facilities available in the district. Three of these present informations on Motor Vehicles and road mileage, while three others relate to Tourist Bungalows. Of the rest two are on railways in the district and last two on Post and Telegraph facilities here.

VII. Miscellaneous— A large number of tables is presented under this item. Valuable information on revenue receipts, ancient monuments, Banking and insurance, etc., occur here.

EXPLANATORY NOTE

TABLE 1—TEMPERATURE DATA AS RECORDED AT COIMBATORE

Information data as recorded by the meteorological department at Coimbatore station is presented below for the period 1951–60 separately for each month. The recordings up to 1957 are in Farenheit and since 1957 in Centigrade.

TABLE 2—RAINFALL STATISTICS

Five statements are presented giving data on Rainfall recorded at five different stations in the district so as to enable the reader to have a general idea regarding the rainfall variability within the district. Information on the number of rainy days, monthly rainfall and heaviest rainfall recorded during 24 hours is furnished for every month during the period 1951–60. The annual average rainfall for the selected stations are given below.

	INCHES
Dharapuram	22·66
Coimbatore	24.52
Erode	28·97
Pollachi	36·26
Anamalai	155·70

TABLE 3—LAND UTILISATION OR CLASSIFICATION OF AREA IN THE DISTRICT

The table presents data on classification of area in the district during 1905–06 to 1959–60. Information is given under six different heads, viz., under forests, not available for cultivation, cultivable area other than current fallows, current fallows, net area under cultivation and acreage under crops. In these areas not available for cultivation includes uncultivable lands and land put to non-agricultural purposes while cultivable area other than current fallows includes cultivable waste, permanent pastures, other grazing lands, land under miscellaneous tree crops and other fallow lands. However, the data presented represent position as existed during each year. Due to alterations in the jurisdiction of Coimbatore district the data are not quite comparable.

TABLE 4—STATEMENT SHOWING ACREAGE UNDER DIFFERENT CROPS

The table presents data on acreage cultivated under different crops during 1905–06 to 1960–61. Scrutiny of the data for the last decade will show that variations have occurred in area cultivated under these crops. Area cultivated under paddy recorded an increase

while under cholam, cumbu, ragi, etc., recorded a decline. Total pulses and cereals have recorded considerable rise in acreage and similar rise has been noticed under total oil seeds, cotton and sugarcane.

TABLE 5—STATEMENT SHOWING AREA IRRIGATED AND ITS SOURCES DURING 1905-06 TO 1960-61

The table presents data for the period 1905–06 to 1960–61. Information is furnished under four main heads, viz., Canals, Tanks, Wells and Other Sources. Taking into consideration figures for the last one-decade alone, it would be found that remarkable progress has been achieved in this field. Total area irrigated has recorded considerable increase moving up from 384,311 acres in 1950–51 to 637,044 acres during 1960–61 thus recording more than 70 per cent rise. Similar trend is visible under each head.

TABLE 6—STATEMENT SHOWING AREA IRRIGATED UNDER DIFFERENT CROPS

The table presents data on area irrigated under each crop for the period 1950–51 to 1960–61. Due to improved irrigational facilities provided, the acreage irrigated has increased and this is reflected here. Under all crop, there has been increase in area irrigated and this will be further clear from the following small table which will show increase in area irrigated under different groups during the period in terms of percentage rise over 1950–51 positions.

	Percentage increase over 1950–51
Paddy	143·68
Cholam	39·23
Total cereals	88·03
Sugarcane	129·79
Total food crops	98·34
Cotton	65·82
Non-food crops total	67·13
Total area irrigated under crops	88·53

TABLE 10—DETAILS OF CROPPED AREA IN THE DISTRICT

Information is furnished for the period 1950–51 to 1960–61 for each year. Details of gross cropped area under food and non-food crops, area cropped more than once and net area cropped are presented. Total gross cropped area has recorded 11·24 per cent rise over 1950–51 position while the net area has recorded a small decline. But this is more than compensated by the rise in area cropped more than once—to the tune of 103 per cent.

TABLE 11—PERCENTAGE OF AREA UNDER PRINCIPAL CROPS IN THE DISTRICT

Information on the percentage of area under chief crops of the region and under certain groups like cereals, food crop, non-food crop etc., is presented in the table. Information for 1950 51 or 1960–61 enables us to have a comparative study. It is found that percentage

of area under paddy has increased and similar trend has been noticed under cholam and cumbu while slight decline in percentage of area occupied by Ragi is noticed. Total food crops have recorded a slight decline in percentage—from 66·8 in 1950–51 to 65·6 in 1960–61—while non-food crops have improved their position by moving up from 33·2 to 34·4. Further details will be found in the statement itself.

TABLE 19—ESTIMATED PRODUCTION OF MILK IN THE DISTRICT

The table presents information on the estimated milk production for the decade 1951–61 in the district. The figures presented are in terms of 1,000 kgs. and this has been indicated at the beginning of the table. Though the total production has increased by 30·55 per cent over 1951 position, cows' milk has recorded only a lower percentage increase viz., 23·62 only while production of buffaloes' milk has increased by 43·74 per cent. Table is presented for three years only 1951, 1956 and 1961 but this gives us the picture for the decade as a whole.

TABLE 20—STATISTICS RELATING TO THE EMPLOYMENT EXCHANGE OFFICE

The table presents information on the number of persons registered for securing employment, persons provided with employment for technical and other personnel separately. There exist only one employment office in the district and registration here shows a declining trend from 14,142 in 1950–51 to 13,707 in 1960–61. This declining trend is visible not only in the number of registrations but also in the number of persons on the live register. Cancellations have almost doubled. This is perhaps because a number of persons have been able to secure employment through other sources.

TABLE 29—REGISTERED BIRTHS IN THE DISTRICT

The table presents information on the number of registered births by months for each year for 1954–60 period. The number of births registered has considerably increased. This is more so in the case of female births which has recorded 18·9 per cent rise over 1954 position. In the case of male births this is only 18·4 per cent.

TABLE 30—DEATHS DUE TO SPECIFIED CAUSES

Details of deaths due to eight specified causes have been given in the table. Information is available by month for each year. The variation in mortality rate due to various causes will be evident from the small inset table here.

TABLE 39—DETAILS OF CRIMINAL JUSTICE

Information on the number of cases reported, tried and the number of persons convicted or executed is also given separately for each category of offence. Twenty-one different categories of offences have been mentioned and data furnished. The number of cases reported, brought to trial and the number of persons convicted have all shown a remarkable increase during the decade. The small inset table here will give data on this—

TABLE 40—THE NUMBER OF JAILS AND THE DAILY AVERAGE NUMBER OF PRISONERS

The statement presents information relating to various penal institutions (Jails) in the district. There are 14 jails in the district of which 13 are sub-jails and the other one is a Central Jail at Coimbatore. Though the total accommodation available in these jails has not changed since 1950—as is evident from columns (6) and (9) of the statement—there has been a slight decline in the daily average number of prisoners in all the sub-jails except those at Erode and Avanashi. But the Central Jail has recorded a marked rise in the daily average number of prisoners.

TABLE 51—COST OF LIVING INDEX NUMBER FOR COIMBATORE

The table presents the Cost of Living Index for Coimbatore City for each month for the period 1951–61 and 1956 June has been taken as the base for purposes of calculation.
